

Java

```
class Solution {  
    public int longestMonotonicSubarray(int[] nums) {  
  
    }  
}
```

JavaScript

```
/**  
 * @param {number[]} nums  
 * @return {number}  
 */  
var longestMonotonicSubarray = function(nums) {  
  
};
```

TypeScript

```
function longestMonotonicSubarray(nums: number[]): number {  
  
};
```

C++

```
class Solution {  
public:
```

```
    int longestMonotonicSubarray(vector<int>& nums) {  
    }  
};  
-----
```

C#

```
public class Solution {  
    public int LongestMonotonicSubarray(int[] nums) {  
    }  
}
```

Kotlin

```
class Solution {  
    fun longestMonotonicSubarray(nums: IntArray): Int {  
    }  
}
```

Go

```
func longestMonotonicSubarray(nums []int) int {  
}
```
